Hi,

I've got a bunch of NAF 47848-1 coax connectors. All I have been able to learn about them is that USS Pampinito is/was looking for some for an IFF=

unit. Anyone know of other units that use them? I am going to hold on to
some for stock at USS NJ, but if anyone needs a few, let me know.

Like Dow-key. 115VAC coil, external DPDT contacts. Tarnished but not
corroded. External contact lugs unused. I'll throw in a Blitz Bug that came
with it.

\$25 plus a few bucks to ship.

Phil & Group,

Besides the several (mostly Navy) sets already mentioned, the 837 was also
used in:

Collins 16F

17H-2 (ATC)
231B
231D

Halstead 10-LFA
GO-9

TBW
SCR-237T4
SCR-240
BC-319

328
330
339
401
420
460

RC-52

(Source SB 11-17 [mostly])

>Can anyone tell me what equipment used the 837 tube....it
looks about like an 807 to me.<

REA empowering Rural Hams and Shortwave Listeners! Need artifacts and paper
on Rural electrification for display

this weeks big quest is the continuation of the search for ANYTHING related
to rural electrification admin.. posters (lester beall) and others, old
hand bills, electrify your farm 'catalogs' pictures of willie wirehands
(he is the rural reddy killowatt cute!) Books on REA etc etc ANYTHING!!!!

check your paper stash and let us know, also if you know any good paper
dealers you have corresponded with in the heartlands please let us know,
they have more of this stuff than the locals here!

thanks ed sharpe!

The 837 is also featured in several projects described in GE Ham News in the late 1940s. They recommended the "GL" version of the tube, of course.

I was wondering about the high prices that ARC-5 stuff is going for on E-bay. A reasonable looking 80 mtr. receiver just went for \$76!

I'm still sad about the loss of a friend I went to high school with, who died a couple of years ago. You don't expect people in their 30's to die of heart attacks... anyway he had also borrowed my absolutely mint and unused 40 mtr. receiver, black wrinkle finished which I got at the Gaithersburg Md. hamfest in 1978 for \$5.00 complete with new dynamotor and a tuning key.

It may have been thrown away by his father who cleaned out all the personal belongings after the funeral. Or perhaps he'd lent it to someone else. Anyway it's gone for good and it looks like it's going to cost quite a bit to replace it.

Tired of noise from Dulles Airport, BWI or National?

For Sale

Here are 2 relatively scarce BA books for the aficionado:

Calling CQ by Clinton DeSoto. This is the original 1930's hardback in very good or excellent condition. Ex-library with library markings. \$33 PPD

Clandestine Operation by Pierre Lorain, Macmillan, 1983. Subtitled "Arms and Techniques of the Resistance 1941 - 1944." This book is translated from the original french and is now out of print. It includes coverage of operations and some schematics for many of the radios parachuted into France during WWII. Other fascinating topics covered like how to guide a plane in for a landing behind enemy lines plus the operations of many different types of small and not-so-small arms. Excellent condition with dust jacket. \$43 PPD

Free: Somehow I have come into posession of a cabinet for a Heathkit HO-10 monitor scope.

The cabinet is in nice shape with a few paint dings and some dents (from the inside) on the rear. Yours for the cost of postage which should be less than \$8 or \$9 anywhere in the USA.

Thanks.

!!!THIS INFORMATION HAS CHANGED!!!!

!!!SAVE THIS FILE FOR FUTURE REFERENCE!!!!

This periodic post is designed to help everyone gain more value from their boatanchors subscription.

Often I receive an email request, or I read on the list, of someone who is aware there is an archive available with some special files with special information that is of a more permanent nature than a post to the list, but who is unaware of how to retrieve these gems.

In the archives, there are cross-reference tables for Tubes, Military Equipment Nomenclature, suggestions for restorations and modifications to our beloved fire bottle rigs, and some wonderful stories of real adventures and the people involved.

These files may be accessed by the Web... quickly and easily.
These files can also be accessed by email.

For WWW access:

- go to <http://www.theporch.com>
- select "Mailing List Web Interface"
- on your first time there, click "Register For Full Account"
- follow the instructions, and BE SURE you use the email address that you have your BoatAnchors mail addressed to -- this interface will work ONLY for members of the list!

Once registered, you can:

- search the archives of previous posts (so far we haven't loaded all the previous posts online, but that is in the works;
- download the index of files;
- retrieve individual files
- manage your subscription via the web interface

AWESOME!

For email access:

Step One:

send an email (leave the subject blank, or, if your mailer requires a subject, type a single character, like "a" in the subject box) to:

listproc@sco.theporch.com

Step Two:

in the body type:

index boatanchors

NOTE: The index **includes** all the previous articles now available through the web interface, so the index is HUGE and difficult to search -- the web interface is much easier.

Step Three:

after checking out the index for files of interest, and finding the one or more you want to have sent to you, send another email to:

listproc@sco.theporch.com

and, in the body, type:

get boatanchors file.name

where you substitute the name of the file from the index for "file.name"

This should get you off to a good start. If you encounter any problems, please let me know at the address below.

I have a surplus BC-453B (Western Electric) I want to get rid of. This receiver tunes 190-550 kHz. IF freq is 85 kHz. Pretty clean unit - even has the rare tuning knob. Modified for 12V filament and has the typical BFO switch, RF gain control, and phones jack on the front plate. Otherwise - no mods except for one cap replacement. Asking \$40.00 plus shipping. Just had it running on the bench and works fine. Appearance-wise is fine. The rubber dynamotor shock mount have been removed.

Content-Type: text/plain; charset=us-ascii
Content-Transfer-Encoding: 7bit

Hello,

The radio/electronics restoration aboard the USS COBIA (SS-245) is coming along nicely. There are a couple of pieces of equipment that the Maritime Museum does not have documentation for...if anyone has a manual or copy that we could buy it would help.

Manuals needed: RBS-2 receiver, RAL receiver, SD-1 radar, APR-1 receiver, TED transmitter, R266A/URR13 receiver.

We are also looking for a LM-18 (with cal book & power supply) as the original is missing in action.

We are also looking for the 5/16 multi-strand antenna cable used topside as well as the brass clamps and insulators (long or short ones)...we found one roll of NOS antenna wire and three insulators in the boats spares lockers but that isn't enough to rebuild both the port and stbd long wires.

Any help would be appreciated.

Tom Aschenbrenner

Subject: 6V5GT vs 6V6GT

Look to be same tube but beam-formers pinned-out separately & cathode tied to one fil. lead

Why was such a thing ever built, ask I staring @ 2 NIB examples

Thinking of rewiring a Ampex 620 amp/spkr. to use 'em instead-a 6V6s.

Perhaps they're the tube-analog of the philosopher's stone.

Certainly the Ampex's Altec/WE 755 speaker isn't the audio answer - a K-mart Morse CD player sounds better. (I'm bridging one dummy-loaded Morse speaker lead into the Ampex)

Content-Type: text/plain; charset=us-ascii
Content-Transfer-Encoding: 7bit

This is really embarrassing. I had a Linux/Netscape failure here and lost a piece of email from a fellow list member that had a pair of LM-18's. Could you please re-respond?

Also, thanks to all of you that responded for help in getting the various manuals that we need. To date the only thing we don't have covered is the SD-1 RADAR. We can't make it operable (it transmits on 116Mc/s) but the mast seems to have been used as an emergency antenna for HF work and I would like to have that operable. The mast hoist is in the process of being restored.

The previous trip to the boat restored to working the 1MC (boat wide announcing and alarms - collision, dive, general quarters). It is completely duplicated so it can be more resistant to battle damage and one half was repaired. It was the first time in many years that the collision and general quarters alarms were heard! I brought the other signal generator back here to Dallas for repair..does anyone have a generic output transformer that would work in the plate ckt of a 6SC7 and have a 500 ohm secondary? It also needs a 8000 ohm 40W resistor..now I have a great supply of parts but not a 40 watt version!

The TCS receiver, transmitter, and power supply were also restored. After the TCS was finished it was really nice to hear radio noise coming from the radio room.

I'm off the boat in a couple of weeks for a week and the next items up for restoration are a pair of RBO's (one in crews mess and the other in the officers ward room) and the RBS-2. That ONLY leaves two RAK's, two RAL's, the TBL, the APR-1, the DAS-3 and misc.

Thanks again for all the help,

Tom Aschenbrenner

Gang-

This is a reminder that reposting of For Sale or Wanted items from other internet sources (lists and auctions) is discouraged.... may prohibited on the BoatAnchors list.

If a BA list member wants to post the item elsewhere and on the BA list, that creates NO problem. What we are trying to avoid are "seen on EBay" or "prime rig on xxx list" type posts... Very few BA members limit their searching to just the BA list!

The problem comes when the poster in the other venue is not asked about the re-post... without the permission of the poster, problems are guaranteed, and I do not have the time, the energy, or the desire to address and deal with the headaches that re-posting causes... I'll grant you that folks in other venues need to be re-calibrated, but I do NOT want to referee! ;^)

So, henceforth, let's have NO re-posts from other sources referred to the list. Yes, I know this may sound pretty provincial, but those who really care have browsers and know where to look, and those who don't, probably don't....

I do NOT need the aggravation of someone who posts to a newsgroup and then has to fight off the hungry folks from the BA list who want to rearrange his viewpoint or calibrate his selling technique.

ENOUGH! Already... Just don't do it!

Your friendly local Rat Shack is liquidating a whole load of speakers, at about 75% off of list price. Got some decent 5" jobs for 1.95 each, and the 8" were 2.95.

They're on closeout so I had to hunt a couple stores for 'em.

Good deal!

Hi Gang,

I was visiting Archive.org this evening and came across their Movies =
page. This section feature nearly 1000 films, mostly shorts, newsreels =
and promotional movies, from the 1920s through the 1970s.

I found many great movies there, but of special interest was "Voice of =
Victory", produced during WWII by the Hallicrafters Company. This film =
highlights the role of radio in combat, and especially the famous =
SCR-299 set manufactured by Hallicrafters. Footage of the Super Sky rider =
and other Hallicrafters gear is prominent. Best of all, it's free for =
download, or view it in streaming video.

Navigate your browser to <http://www.archive.org/movies/bytitle.html>, and =
scroll down to "Voice of Victory". Enjoy it!

Looks like I missed the "plain text only" direction, hi!

Visit: <http://www.archive.org/movies/bytitle.html> and scroll down to "Voice of Victory". You'll find it there for download or streaming.

This section feature nearly 1000 films, mostly shorts, newsreels and
promotional movies, from the 1920s through the 1970s.

At the local Los Altos swap yesterday I picked up the eleventh edition of
the Radio Handbook. I had been looking for this edition for a while because
it has a whole chapter devoted to converting surplus equipment such as the
BC-342, BC-348, ART-13, etc.

The book was published in 1947 and while intact, the pages are decidedly
yellow, especially around the edges. I think I have a case of acid-based
paper decay here and I wondered if there is a homespun way to treat it. I
was thinking of putting the book in a sealed container with a dish of
ammonia solution so that in time the alkaline ammonia would neutralise the
acid attacking the paper.
